PROFESSIONAL SUMMARY

I am a passionate and driven technology enthusiast with experience in research, development, and AI-related projects. I hope to work with people to create smooth, efficient, and stress-free solutions that genuinely make a real impact on society and company. Seeking an AI Engineer role to apply machine learning, NLP, and AI development skills in driving innovation within Malaysia's industries.

EDUCATION

Bachelor of Science (Hons) in Computer Science

Asia Pacific University of Technology and Innovation (APU)

September 2024 – Present

GPA: 3.83 / 4.00

Foundation in Technology

Asia Pacific University of Technology and Innovation (APU)

September 2023

CGPA: 3.87 / 4.00

Sijil Pelajaran Malaysia (SPM)

SMK Teriang Hilir

April 2022

6A+, 2A, 2A-

PROFESSIONAL EXPERIENCE

President

Artificial Intelligence Club (AIC), Asia Pacific University

December 2025 – Present

- Lead and manage a student organization of 30+ active members, overseeing strategic direction, operations, and event execution.
- Plan and organize AI-focused workshops and hackathons, coordinating logistics, technical content, and participant engagement.
- Collaborate with university leadership and external stakeholders, including sponsors and industry partners, to support event initiatives and partnerships.

Business System Operation Intern

U Mobile SDN BHD

July 2025 – November 2025

- Developed and deployed a web portal, building scalable backend APIs with AWS Lambda and integrating MongoDB and PostgreSQL (AWS RDS) to support large-scale data operations and reporting. I also integrated it with AWS Cognito for secure authentication and user management.
- Designed APIs to efficiently export datasets of over 2 million records.
- Implemented a CI/CD deployment pipeline using Linux shell scripts and AWS Pipeline, streamlining code deployment and reducing manual release effort.
- Acted as temporary team lead for 2 weeks, coordinating development tasks, managing progress, and communicating with stakeholders during sprint cycles.
- Involve in an IT Helpdesk Bot project using Microsoft Copilot Studio and Power Automate, automatically suggesting solution for internal common technical issues and enabling seamless escalation to IT support teams via Microsoft Teams.
- Optimized a web scraping system by redesigning browser usage, reducing data extraction time by approximately 5 minutes and improving overall efficiency.

R&D Project Lead

Artificial Intelligence Club (AIC), Asia Pacific University

October 2024 – December 2025

- Designed and maintained the club's official website, ensuring relevant content delivery and optimised user experience for event announcements and resources.
- Delivered technical presentations and live demos of AI models during workshops, communicating complex concepts clearly to diverse audiences.
- Collaborated with cross-functional teams to ideate, prototype, and deploy intelligent solutions with real-world applicability.

TECHNICAL SKILLS

Programming

PYTHON	JAVA	JAVASCRIPT	CSS	HTML
REACT	DART			

AI Frameworks & Tools

HUGGING FACE	N8N	AI AGENTS	MCP	SKILLS
DEAI	RAG	LANGCHAIN		

ML /Analytics Tools

MATLAB	TEXTBLOB	SCIKIT LEARN	PYTORCH	PANDAS
ROBOFLOW	XAI			

Services Provider

AWS	GCP	AZURE
-----	-----	-------

ACHIEVEMENTS & COMPETITIONS

GOLD/TOP 3	International Inter-Varsity Challenge 2024 Nation Hackathon X Hackathon 2025
SILVER	Nation IUCEL x KNOVSI 2024
TOP 10	Nation AWS Great AI Hackathon 2025 Nation KITAHACK Hackathon 2025 APU Hackthletes Solana Hackfest 2024 APU Joget NextGen Hack 2024
EX	Nation KITAHACK Hackathon 2026 International Microsoft Imagine Cup 2026 Nation Huawei Hackathon 2025 International IBM TechXchange Hackathon 2025

CERTIFICATIONS & TRAINING

- MD PDTI Tech Club Intensive Workshop 2026 - MDEC
 - 5G Pioneers program - Ericsson
 - 5-Day AI Agents Intensive Course - Google
- Generative AI Foundations - AWS Academy Graduate
 - Build 17 Beginner Projects (Python | JavaScript | C#) – Udemy
 - NAv7: Introduction to Networks – Cisco
